

FIT GUIDE

First of all, if you try on a pair of goodr sunnies and they're comfortable, and you like the way they look? They fit!!!

But we understand that sometimes you just need a little guidance and reassurance when it comes to validating your choices. Hey, you're only human, right? (You are human, RIGHT?!) The rocket surgeons at goodr created a handy Fit Guide for you that shows you which frames will best suit petite noggins, medium noodles, and melon heads.

MEASUREMENTS WE USE

If you must know, we used these 3 data points to come up with these scientific frame recos:

1. INTERNAL FRAME WIDTH

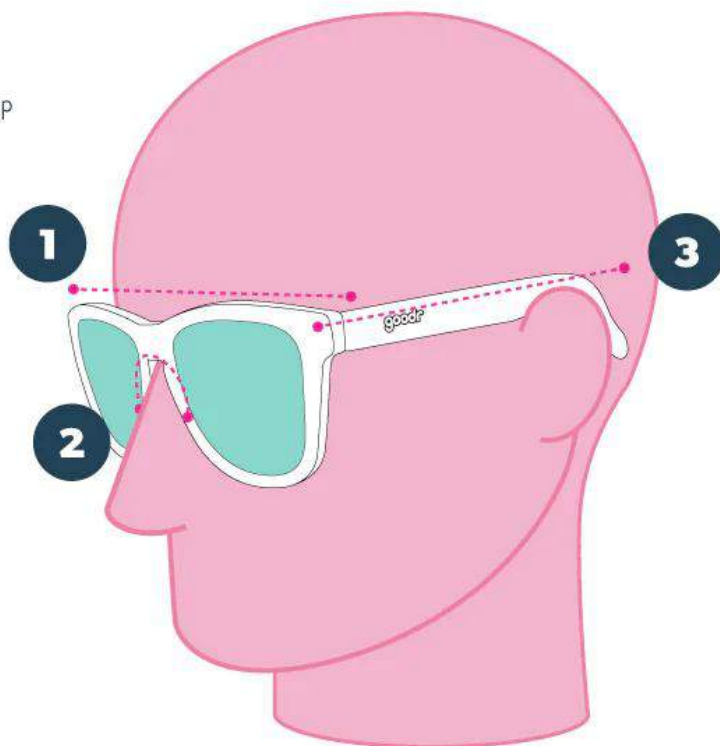

The Internal Frame Width correlates directly with your head width and the function of **"NO SLIP / NO BOUNCE"**.

2. INTERNAL BRIDGE WIDTH

Internal Bridge Width ensures a proper contact with nose pads and your nasal bones.

3. FRAME DEPTH

Frame depth is the measurement including frame curvature and temple length.
